

Experiment 7

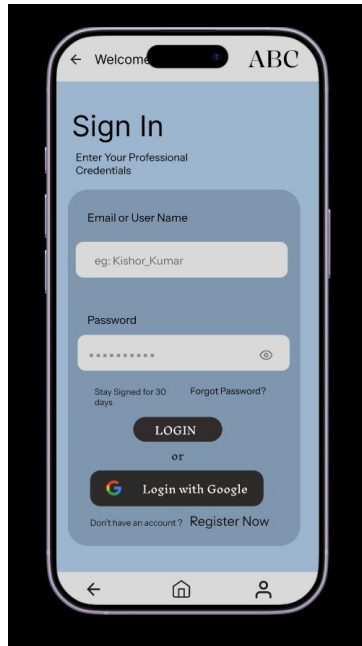

Kishor Kumar Purushothaman
240701272

AIM: The aim is to trial different app layouts and color schemes and evaluate user feedback on aesthetics and usability using GIMP.

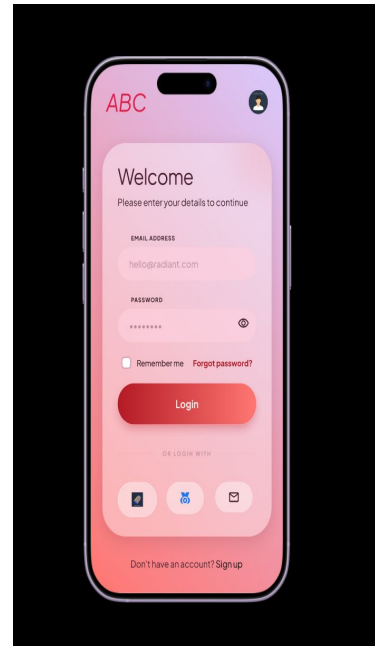

App Layout Designs

Layout 1
(Rose/Mauve Theme)

Layout 2
(Blue-Grey Theme)

Layout 3
(Gradient Pink Theme)

PROCEDURE:

Step 1: Install GIMP

- Download and install from the official website.

Step 2: Create a New Project

- Open GIMP
- Canvas Size: 1080 × 1920 pixels (standard mobile screen)

Step 3: Base Layout Design

1. Divide Sections:

- Use Rectangle Select Tool to define Header, Content Area, and Footer.
- Fill using Bucket Fill Tool with base colors.

2. Add UI Elements:

- Text Tool: For headings, button texts, and labels.
- Shape Tools: For buttons, input fields, image placeholders.

3. Layer Organization:

- Assign each UI component to a separate named layer.
- Example: Header, Button Login, Text Title, Input Field Email

Step 4: Create Colour Variants

1. Duplicate Layouts:

- Right-click on the project tab > Duplicate.
- Edit each with different colour schemes using Colorize Tool or Bucket Fill.

2. Save Layouts:

- File > Export As:
 - Layout1.png – Layout2.png – Layout3.png

Step 5: Collecting User Feedback

Google Form Link: <https://forms.gle/sxuuHVgaTmMWeRKv6>

Procedure:

- Shared all three layout images with users.
- Asked users to rate based on: Visual appeal, Usability, Readability, and Colour preference.

User Feedback:

Layout 1 – Rose/Mauve Theme:

- Warm, welcoming colour palette with a rosy-mauve background that feels elegant and professional.
- The 'WELCOME' heading with bold sans-serif font stands out clearly against the muted background.
- Suggestion: Improve colour contrast between input fields and background for better readability.
- Suggestion: Add subtle shadow or depth to the LOGIN button for a more interactive feel.

Layout 2 – Blue-Grey Theme:

- The muted blue-grey scheme gives a calm, corporate aesthetic with good visual hierarchy.
- 'Sign In' heading is large and prominent; navigation bar at top adds context.
- Suggestion: Slightly cluttered feel — increase spacing between input fields and action buttons.
- Suggestion: The overall palette could use a slight accent colour to guide user attention.

Layout 3 – Gradient Pink/Purple Theme:

- Vibrant pink-to-purple gradient background is visually striking and modern.
- Clean card layout with ample whitespace creates a premium, minimal look.
- Login button in bold red draws the eye effectively and signals the primary action.
- Suggestion: Keep the clean design; optionally offer a dark/light theme toggle in the final product.

Final Recommendation

Preferred Layout: Layout 3 (Gradient Pink/Purple Theme)

Why?

- Clean and modern look with excellent visual hierarchy.
- Excellent usability — all elements are clearly spaced and labelled.
- Balanced and vibrant colour scheme with high contrast.

- High user satisfaction in both function and form.

Step 6: Iterate and Refine

1. Refine the Design:

- Based on the feedback, make necessary adjustments to the layout and color scheme.
- Experiment with additional variations if needed.

2. Final Testing:

- Conduct a final round of testing with the refined design to ensure usability and aesthetic satisfaction.

Result: Thus, three different app layout designs with varying colour schemes were created using GIMP and user feedback was successfully collected and analyzed.
